Win with Dataprise Managed Cloud Services

FAQs:

1 How do I know if I am ready for the cloud?

Dataprise helps businesses embrace the cloud and unlock its true potential with effective cloud advisory and consulting services. We have developed a comprehensive Cloud Readiness Assessment (CRA) where we work with you to develop a clear road map to leverage the cost-savings and competitive advantages available in the cloud and make sure you are truly 'cloud-ready'.

2 Does Dataprise offer data center or hosting services?

Dataprise offers a variety of data center and hosting services to ensure your core infrastructure continues to power your business at the most optimal level all day, every day. Our services include:

- Data center hosting and colocation services
- Virtual server hosting
- Data center management and consulting

3 What cloud monitoring services are available through Dataprise?

Dataprise employs robust monitoring services that serve as your eyes and ears, alerting you to any issues related to your network. For businesses that need enterprise-level network monitoring capabilities, we offer highly-customizable cloud monitoring tools with even more granular reporting options and features than our standard monitoring services. Services include:

- Network monitoring
- Managed workstation
- Internet domain management

4 What business continuity solutions does Dataprise offer?

Your data is arguably your most valuable business asset, which is why we do more than just backup your data – we protect it as if it were our own. Our business continuity options include:

- Remote backup services
- Disaster recovery as a service (DRaaS)
- Contingency hosting
