Web and Mobile Solutions

Secure your business' future with dynamic, custom solutions from Dataprise

Today's business climate relies on mobile and web-based collaboration more than ever. An agile company needs its employees to stay connected through web and mobile workflows. At Dataprise, we've been doing this for businesses large and small for over a decade. Whether embarking on a new business solution or trying to revive a failing project, we can help.

Our Web Development and Mobile Solutions team has helped hundreds of companies with back-end-as-a-service, secure cross-platform development, and company process adoption. We bring your web and mobile innovation to life. Let's solve your business problems together.

DISCOVER WINNING SOLUTIONS FOR WEB AND MOBILE SOLUTIONS

SharePoint & Web Solutions

Collaboration and process automation made easy. We can help you with team collaboration, external communications, CRM, process integrations, and much more.

Mobile Solutions

Miscommunication between staff in the field and in main offices can impact turn-around times and negatively affect your customers. Dataprise provides a full range of mobile solutions that provide real-time data, streamline processes, and improved communication among all staff members.

Business Intelligence

Data is critical to managing your business and driving sales. We are BI experts, and can help your team leverage data and turn insights into sales.

FAQs:

1 ### What are the benefits of SharePoint custom solutions?

The Dataprise Web and Mobile Solutions team has created more than 600 SharePoint web parts for businesses ranging from retail to professional services including healthcare, law firms, construction companies, and more. Here are some benefits to custom web parts for your business:

- Improves shared business processes with built-in data validation rules for accurate and consistent data
- Simplifies access to business data with repositories that help your organization store and organize documents in one location
- Effectively helps your team manage and repurpose content, submit for approval, and share amongst team members
- Provides a single, integrated platform that improves flexibility and works with existing systems

2 ### What kind of mobile solutions does Dataprise offer?

Organizations today rely on their mobile devices to manage business processes and to collaborate as a team. Dataprise provides:

- iOS, Android, and Windows phones application development
- Mobile website development
- Web applications

3 ### How can Dataprise's Business Intelligence solutions help my organization?

Data is the lifeblood that powers every organization today, big or small, commercial enterprise or government agency. Turn to Dataprise for Business Intelligence solutions that:

- Grant real-time access to dashboards from anywhere
- Provide greater insight on your business
- Store your data – all in one place
