

Dataprise Managed Data Protection

In today's environment, ensuring IT resiliency is paramount to mitigate risk, achieve business continuity and comply with government and industry regulations. Organization's must have complete confidence in their backup and disaster recovery strategies and leave nothing to chance.

Managed Data Protection services from Dataprise solve these challenges via simplified and highly reliable solutions that help protect and enable rapid recovery of critical business data and applications.

Trusted, Resilient & Fully Managed

Dataprise Managed Data Protection delivers high-performance enterprise-grade backup and disaster recovery solutions built for the midmarket and designed for the cloud era. Built on a scalable architecture and fully managed, our solution enables customers to meet their continuity needs reliably and cost-effectively.

Ensure the Health of Your Data Protection Environment with 24x7 Monitoring and Complete Management

Improve Flexibility & Agility with Protection and Rapid Recovery Across Physical, Virtual and Cloud Layers

Eliminate Disruptions & Downtime with a Highly Effective and Secure Fully Managed Solution

Gain Expertise & Confidence with Dataprise's Experts Running Your Data Protection

Full Backup & Recovery Features that Power IT Resiliency

Whether you need backup and recovery, disaster recovery, any point-in-time recovery or long-term retention, Dataprise Data Protection offers the protection you need. Critical features include:

- **Automated & Secure Backup:** Data is backed-up with best-in-class encryption, ensuring data both in-transit and at-rest is encrypted
- **Redundant Storage:** Backups are stored in a highly redundant and secure cloud storage platform to enable rapid recovery
- **Backup Management:** Through full management and monitoring, backup issues are identified and remediated quickly
- **Reporting:** Gain visibility with weekly backup and repository health reports

Dataprise DRaaS with Veeam

As a Platinum Veeam® Cloud & Services Provider, we understand the need for fast, reliable, and easy-to-use features that minimize downtime and bring efficiency to recovering data and applications in the event of an outage or disaster.

With this offering we leverage Veeam to enable Disaster Recovery-as-a-Service (DRaaS) as part of a comprehensive data protection and availability strategy. Veeam Backup & Replication™ is the industry-leading availability solution for cloud, virtual, and physical workloads.

Dataprise DRaaS with Veeam Cloud Connect delivers:

- Local backup with a retention policy
- Remote (cloud) backup with a retention policy
- Enhanced Data Protection, our proprietary Insider Protection technology
- Failover capabilities to our remote data centers

Through using Veeam, we provide additional capabilities including:

- Cloud, virtual and physical backup and recovery options
- Recovery Strategies for Single and Multiple VMs
- Powerful NAS backup (local only)
- Image-based virtual machine (VM) replication from a VM or backup
- Built-in management and deployment for Veeam Agents for Linux and Microsoft Windows
- Advanced storage integration
- Enterprise plug-ins for SAP HANA and Oracle RMAN
- Data integration API and Universal Storage API
- Built-in WAN Acceleration including a high-bandwidth mode (optional)
- Encryption, deduplication, and compression of backup files

Advantages of Dataprise’s DRaaS with Veeam

Monitoring & Reporting	Support	Testing	Security
<ul style="list-style-type: none"> • Continuous monitoring of the local and remote backup environment • Real-time status shows recoverability • Daily updates of current local and remote restore points • Single pane web portal 	<ul style="list-style-type: none"> • 100% Veeam-focused • Deep level of Veeam expertise • Assistance with configurations and support at no additional cost • DRaaS – RTO 4 business hours/RPO 8 business hours • Replication – RTO/RPO as low as 1 hour 	<ul style="list-style-type: none"> • Full annual DR test at no additional cost • Automated health checks of backup files • Status monitoring of local appliances with testing for low memory, disk space, anti-virus, and Windows update compliance 	<ul style="list-style-type: none"> • Security perimeter extends to the local backup repository, if managed by Dataprise • Enhanced Data Protection takes Veeam Insider Protection to a new level • 24x7x365 Security Operations Center

Cloud-to-Cloud Protection for Microsoft 365

Boost business continuity and resiliency of your Microsoft 365 environment with Dataprise Managed Data Protection services. Through advanced Direct-to-Cloud remote backup technology, Dataprise delivers complete, unified data protection integrated with an organization's business resiliency strategy.

- Data protection from edge to core to cloud
- Protect virtual and physical servers
- Backup and restore
- Disaster recovery
- No performance impact
- Improved ransomware recovery

About Dataprise

Founded in 1995, Dataprise believes that technology should enable our clients to be the absolute best at what they do. This commitment to client success is why Dataprise is recognized as the premier strategic managed service and security partner to strategic CIOs and IT leaders across the United States. Dataprise delivers best-in-class managed cybersecurity, disaster recovery as a service (DRaaS), managed infrastructure, cloud, and managed end-user services that transform business, enhance user experiences, and eliminate risks.
