

Dataprise Managed User

Managed user solutions that support your users where they are, when they need it.

Supporting your end-users can be time-consuming. Fully optimizing and securing their technology can be near impossible. Let us take care of IT.

Our Managed User solutions help organizations focus on their strategic IT initiatives and increase productivity through best-in-class end-user support. With a 24x7 multi-channel service experience, you can rest easy knowing your employees are supported with efficient technology that enables them to drive your organization's mission forward.

We can help your business:

1. Keep your employees productive and happy with a best-in-class support experience
2. Support a remote and hybrid workforce where they are located
3. Allow your IT team to focus on strategic projects that help you achieve your mission
4. Scale your support as your business expands with new team members or in new geographies

Benefits of our Managed User Solutions Include:

- Multi-channel user support
- Options for US-based and 24x7 support
- Financially backed Service Level Agreements (SLAs)
- VIP Services
- Options for Line of Business (LOB) application support
- As needed field service escalations
- White labeling abilities
- Reporting and insights
- Integration with our fully managed support stack, where we maintain and support users, endpoint devices, infrastructure, and security
