

Managed Mobility Services

Powered by *Wireless Watchdogs*, a Dataprise Company

Managed Mobility Services (MMS) give you efficiency, cost-effectiveness, security, and insight across the entire mobile device lifecycle.

Dataprise MMS, powered by Wireless Watchdogs, takes care of your mobile devices from procurement and outfitting all the way through their end-of-life. It removes the burden of device management and support from IT, reduces wireless expenses, and helps to ensure the safety and security of the devices and the data they access.

We centralize and consolidate workflow, improve efficiencies, and significantly reduce the costs and headaches of maintaining wireless devices for our clients.

Here's a overview of what you can expect:

WIRELESS EXPENSE MANAGEMENT

Rate plan analyses and optimization, unused line reduction, invoice consolidation, and overage prevention combine to reduce the costs of fielding mobile devices.

REPORTING SERVICES

Preconfigured and custom, user-built reporting capabilities provide management insights into device usage at summary, organizational, and financial account levels, enabling informed decision-making.

MOBILE DEVICE SECURITY

Mobile devices are secured through security policy creation and implementation for device tracking, locking, and wiping, and detection of excessive login or jailbreaking attempts.

CUSTOMER SUPPORT SERVICES

Business-hours admin support and after-hours support for lost or stolen devices are coupled with a ticket-driven system that frees internal IT staff while keeping mobile workers connected and productive.
