DATAPRISE

IT Comply: Co-Managed IT Services

For businesses with compliance requirements, IT Comply provides the added controls and documentation needed to stay consistently audit-ready. You get annual DR testing, compliance assessments, monthly reports, and MFA trustedaccess, built into a cohesive co-managed solution.

Consistently Audit-Ready

Ongoing assessments and structured reporting reduce compliance gaps and give you confidence that your environment meets the standards that matter.

Annual Disaster Recovery Testing

Ensure your organization can quickly recover from outages or cyber incidents.

- Validates backups, failover, and restoration processes
- Demonstrates operational resilience for auditors
- Reduces downtime and operational disruption

Annual Compliance Gap Assessment

Identify gaps in your controls and processes before they become audit issues.

- Uncovers and documents weaknesses in policies, procedures, and technical safeguards.
- Provides a prioritized roadmap for remediation
- Helps stay ahead of evolving regulatory requirements

MFA Trusted Access

Strengthen security by ensuring only authorized users can access critical systems.

- Adds a second layer of authentication for key accounts
- Reduces risk of unauthorized access and breaches
- Meets a key compliance requirement for many regulations

vCIO Monthly Compliance Review

Stay consistently informed on your compliance posture throughout the year.

- Tracks metrics, controls, and remediation status
- Provides auditors with up-to-date documentation
- Turns compliance into a predictable, proactive process

One Co-Managed Solution

IT Comply includes everything in our IT Fortify plan, where we manage four essential elements of your IT to streamline operations and provide full cybersecurity protection:

End-User Support

Fast, reliable, and high-touch support that keeps our users productive.

Managed Data Protection

Secure and redundant backup coverage for the ultimate peace of mind.

Infrastructure Management

Proactive management that keeps your systems healthy and stable.

Dataprise Cyber Premier

Always-on security that actively defends against modern cyber threats.
