

AI Readiness Assessment

Turn AI Ambition into a Confident, Executable Strategy

DATA

Artificial Intelligence is no longer a future initiative, it's a present-day business decision with real financial, operational, and regulatory consequences. Yet many organizations rush into AI investments without the structure, governance, or data readiness required to succeed. The result? Wasted spend, stalled initiatives, and increased risk.

Dataprise's AI Readiness Assessment helps leadership teams take a disciplined, strategy-first approach ensuring your organization is truly prepared to adopt and scale AI.

Start Smart. Scale Responsibly

Most organizations overestimate their readiness for AI while underestimating the complexity of execution. Without a clear foundation, even promising AI initiatives can fail to deliver value or worse, introduce risk. This engagement provides a comprehensive, objective evaluation of your organization's ability to adopt AI across five critical domains. No pilots without data readiness. No experimentation without governance. Instead, you gain a clear, business-aligned path forward.

- Strategy & Governance
- Data Enablement
- Technology & Tools
- Operating Model
- Workforce Capability

A Clear View of Your AI Readiness

A quantified baseline of your organization's AI maturity will be established giving leadership an honest, data-driven understanding of where you stand today.

Focused, High-Value Opportunities

Prioritize initiatives based on business impact, feasibility, and your current capabilities so you invest where it matters most.

Risk Visibility Before Investment

From governance gaps to data limitations, we uncover the risks that could derail your AI strategy before they become costly problems.

A Governance Foundation for Responsible AI

AI without oversight is a liability. We define the policies, controls, and accountability structures needed to scale AI safely and responsibly.

A Practical, Executable Roadmap

You receive a 12–24 month roadmap that aligns AI initiatives with business goal sequencing investments to build sustainable capability over time.

Executive-Level Clarity

All findings and recommendations are delivered in a concise, decision-ready format enabling leadership to move forward with confidence.
