Cybersecurity Consulting Services

Dataprise cybersecurity consulting services help organizations move from reactive defense to a proactive, strategy-led security posture. Our experts assess your current environment, identify gaps across risk, compliance, and controls, and design a tailored roadmap aligned to your business goals. From security assessments and policy development to vCISO guidance and incident readiness, we bring the expertise and best practices needed to strengthen your defenses without adding internal complexity. The result is a more resilient organization—prepared for today's threats and built for what's next.

- Firewall Assessment
- Penetration Testing
- Tabletop Exercise
- Compliance Assessment
- Vulnerability Assessment
- vCISO Services
